Notes:

(1) Further detailed information could be found in the common reporting format tables of the Party's greenhouse gas inventory, namely "Emission trends (CO₂)", "Emission trends (CH₄)", "Emission trends (N₂O)" and "Emission trends (HFCs, PFCs and SF₆)", which is included in an annex to this biennial report.

(2) 2011 is the latest reported inventory year.

(3) 1 kt CO₂ eq equals 1 Gg CO₂ eq.

Abbreviation: LULUCF = land use, land-use change and forestry.

^a The column "Base year" should be filled in only by those Parties with economies in transition that use a base year different from 1990 in accordance with the relevant decisions of the Conference of the Parties. For these Parties, this different base year is used to calculate the percentage change in the final column of this table.

^b Includes net CO₂, CH₄ and N₂O from LULUCF.

Abbreviations: CRF = common reporting format, LULUCF = land use, land-use change and forestry.

^a The column "Base year" should be filled in only by those Parties with economies in transition that use a base year different from 1990 in accordance with the relevant decisions of the Conference of the Parties. For these Parties, this different base year is used to calculate the percentage change in the final column of this table.

^b Fill in net emissions/removals as reported in CRF table Summary 1.A of the latest reported inventory year. For the purposes of reporting, the signs for removals are always negative (-) and for emissions positive (+).

^a The column "Base year" should be filled in only by those Parties with economies in transition that use a base year different from 1990 in accordance with the relevant decisions of the Conference of the Parties. For these Parties, this different base year is used to calculate the percentage change in the final column of this table.

^a The column "Base year" should be filled in only by those Parties with economies in transition that use a base year different from 1990 in accordance with the relevant decisions of the Conference of the Parties. For these Parties, this different base year is used to calculate the percentage change in the final column of this table.

Abbreviations : CRF = common reporting format, LULUCF = land use, land-use change and forestry.

^a The column "Base year" should be filled in only by those Parties with economies in transition that use a base year different from 1990 in accordance with the relevant decisions of the Conference of the Parties. For these Parties, this different base year is used to calculate the percentage change in the final column of this table.

^b Enter actual emissions estimates. If only potential emissions estimates are available, these should be reported in this table and an indication for this be provided in the documentation box. Only in these rows are the emissions expressed as CO₂ equivalent emissions.

^d In accordance with the "Guidelines for the preparation of national communications by Parties included in Annex I to the Convention, Part I: UNFCCC reporting guidelines on annual inventories", HFC and PFC emissions should be reported for each relevant chemical. However, if it is not possible to report values for each chemical (i.e. mixtures, confidential data, lack of disaggregation), this row could be used for reporting aggregate figures for HFCs and PFCs, respectively. Note that the unit used for this row is kt of CO₂ equivalent and that appropriate notation keys should be entered in the cells for the individual chemicals.)

Table 2(a)

HUN_BR2_v1.0

Description of quantified economy-wide emission reduction target: base year^a

<i>Party</i>	<i>Hungary</i>		
Base year /base period	1990		
Emission reduction target	% of base year/base period	% of 1990 ^b	
	20.00	20.00	
Period for reaching target	BY-2020		

^a Reporting by a developed country Party on the information specified in the common tabular format does not prejudice the position of other Parties with regard to the treatment of units from market-based mechanisms under the Convention or other market-based mechanisms towards achievement of quantified economy-wide emission reduction targets.

^b Optional.

Description of quantified economy-wide emission reduction target: gases and sectors covered^a

<i>Gases covered</i>		<i>Base year for each gas (year):</i>
CO ₂		1990
CH ₄		1990
N ₂ O		1990
HFCs		1990
PFCs		1990
SF ₆		1990
NF ₃		
Other Gases (specify)		
Sectors covered ^b	Energy	Yes
	Transport ^f	Yes
	Industrial processes ^g	Yes
	Agriculture	Yes
	LULUCF	No
	Waste	Yes
	Other Sectors (specify)	

Abbreviations : LULUCF = land use, land-use change and forestry.

^a Reporting by a developed country Party on the information specified in the common tabular format does not prejudice the position of other Parties with regard to the treatment of units from market-based mechanisms under the Convention or other market-based mechanisms towards achievement of quantified economy-wide emission reduction targets.

^b More than one selection will be allowed. If Parties use sectors other than those indicated above, the explanation of how these sectors relate to the sectors defined by the IPCC should be provided.

^f Transport is reported as a subsector of the energy sector.

^g Industrial processes refer to the industrial processes and solvent and other product use sectors.

Description of quantified economy-wide emission reduction target: global warming potential values (GWP)^a

<i>Gases</i>	<i>GWP values^b</i>
CO ₂	4th AR
CH ₄	4th AR
N ₂ O	4th AR
HFCs	4th AR
PFCs	4th AR
SF ₆	4th AR
NF ₃	
Other Gases (specify)	

Abbreviations : GWP = global warming potential

^a Reporting by a developed country Party on the information specified in the common tabular format does not prejudice the position of other Parties with regard to the treatment of units from market-based mechanisms under the Convention or other market-based mechanisms towards achievement of quantified economy-wide emission reduction targets.

^b Please specify the reference for the GWP: Second Assessment Report of the Intergovernmental Panel on Climate Change (IPCC) or the Fourth Assessment Report of the IPCC.

Description of quantified economy-wide emission reduction target: approach to counting emissions and removals from the LULUCF sector^a

Role of LULUCF	LULUCF in base year level and target	Excluded
	Contribution of LULUCF is calculated using	

Abbreviation : LULUCF = land use, land-use change and forestry.

^a Reporting by a developed country Party on the information specified in the common tabular format does not prejudge the position of other Parties with regard to the treatment of units from market-based mechanisms under the Convention or other market-based mechanisms towards achievement of quantified economy-wide emission reduction targets.

Description of quantified economy-wide emission reduction target: market-based mechanisms under the Convention^a

<i>Market-based mechanisms under the Convention</i>	<i>Possible scale of contributions (estimated kt CO₂ eq)</i>
CERs	
ERUs	
AAUs ⁱ	
Carry-over units ^j	
Other mechanism units under the Convention (specify) ^d	

Abbreviations : AAU = assigned amount unit, CER = certified emission reduction, ERU = emission reduction unit.

^a Reporting by a developed country Party on the information specified in the common tabular format does not prejudice the position of other Parties with regard to the treatment of units from market-based mechanisms under the Convention or other market-based mechanisms towards achievement of quantified economy-wide emission reduction targets.

^d As indicated in paragraph 5(e) of the guidelines contained in annex I of decision 2/CP.17 .

ⁱ AAUs issued to or purchased by a Party.

^j Units carried over from the first to the second commitment periods of the Kyoto Protocol, as described in decision 13/CMP.1 and consistent with decision 1/CMP.8.

Description of quantified economy-wide emission reduction target: other market-based mechanisms^a

<i>Other market-based mechanisms (Specify)</i>	<i>Possible scale of contributions (estimated kt CO₂ eq)</i>

^a Reporting by a developed country Party on the information specified in the common tabular format does not prejudge the position of other Parties with regard to the treatment of units from market-based mechanisms under the Convention or other market-based mechanisms towards achievement of quantified economy-wide emission reduction targets.

Description of quantified economy-wide emission reduction target: any other information^{a,b}

--

^a Reporting by a developed country Party on the information specified in the common tabular format does not prejudice the position of other Parties with regard to the treatment of units from market-based mechanisms under the Convention or other market-based mechanisms towards achievement of quantified economy-wide emission reduction targets.

^b This information could include information on the domestic legal status of the target or the total assigned amount of emission units for the period for reaching a target. Some of this information is presented in the narrative part of the biennial report.

Table 3

HUN_BR2_v1.0

Progress in achievement of the quantified economy-wide emission reduction target: information on mitigation actions and their effects

Name of mitigation action ^a	Sector(s) affected ^b	GHG(s) affected	Objective and/or activity affected	Type of instrument ^c	Status of implementation ^d	Brief description ^e	Start year of implementation	Implementing entity or entities	Estimate of mitigation impact (not cumulative, in kt CO ₂ eq)	
									2020	2030
National Forest Strategy for increasing forest area	Forestry/LULUC F	CO ₂	Increasing forest area	Economic	Planned	The National Forest Strategy 2015-2030 sets the target to 2050: at least maintaining the current level of forestation but preferably increase its share to 27% of total surface of Hungary up to 2050. Neither the quantity nor the quality and value of the forests must not decrease. Use of wood in the society, as an environmentally friendly raw material, shall be encouraged. The Forest management shall ensure that the increased demands for wood would be met, without endangering sustainability.		Ministry of Agriculture		-704.00
Rural development for sustainable and modern agriculture*	Agriculture	CO ₂	Removing obstacles that hinder farmers and producers through the amendment of legislation and regulations.	Regulatory	Implemented	Darány Ignáci Plan: The first pillar aims at removing obstacles that hinder farmers and producers through the amendment of legislation and regulations. The second plans to reduce bureaucracy through the setting up of customer-friendly offices and by reducing administrative requirements. The third pillar focuses on changing people's way of thinking and on providing training courses. The fourth pillar will support rural areas in Hungary by launching jointly financed European Union and Hungarian tenders for rural development projects. The fifth and final pillar includes the preparation, launching and running of national programmes, including for example the Farmstead Programme and the Demographic Land Programme.		Ministry for Rural Development, State Secretariat for Rural Development		
Reduction of nitrate emission in waters and N-cycle*	Agriculture	N ₂ O	Protection of waters against pollution caused by nitrates from agricultural sources.	Regulatory	Implemented	New Nitrate Action Programme: the earlier Government Decision No. 49/2001. (IV. 3.) on protection against the nitrate contamination of waters from agricultural sources (Nitrate Decree for short) referred to in the previous report was replaced and partly superseded by Government Decree 27/2006. (II. 7.), amended by Government Decree 81/2007. (IV.25.). The new decree also identifies the nitrate sensitive areas, contains an extended list of settlements in these areas (67 settlements were deleted from the list, 320 added), states the general rules of protection against nitrate pollution and prescribes an overall, coherent, nation-wide action plan.	2013	Ministry for Rural Development, Agricultural and Rural Development Agency

									2020	2030
Forest-environmental and agricultural payments of European Agricultural Fund for Rural Development (EAFRD) and Common Agricultural Policy (CAP) *	Agriculture, Forestry/LULUC F	CO ₂ , CH ₄ , N ₂ O	Competitiveness of agriculture, forestry and food industry; Improvement of the condition of the environment; Quality of life in rural areas	Economic	Implemented	The Rural Development Programme for the period of 2014 - 2020 puts particular emphasis on actions related to restoring, preserving and enhancing ecosystems, promoting social inclusion, poverty reduction and economic development in rural areas and promoting food chain organisations and risk management in agriculture. Main obstacles are as follows: Mitigation of agricultural emissions with partial change of nitrogen fertilizer utilization and cultivations change Support for perennial herbaceous energy plantation Complementary financing to support the plantation of energy crops Climate protection by efficient manure management and biogas	2015	Ministry of Agriculture		
Ányos Jedlik Plan*	Transport	CO ₂ , N ₂ O	promoting electro-mobility		Implemented	The Plan, a blueprint for the regulatory and support framework has been formulated to promote electromobility in Hungary through, among others, the establishment of a country-wide network of charging stations and the streamlining of taxation and legal requirements of electric cars.	2015	Ministry for National Economy		
National Transport Infrastructure Development Strategy *	Transport	CO ₂ , N ₂ O	development of transport infrastructure with a focus on promoting sustainable transport	Economic	Implemented	The main task of the NTS is to determine the transport strategy until 2030 with an outlook until 2050 and with a first phase until 2020 with special regard to the supports for transport development of EU budget cycles beginning in 2014.	2014	Hungarian Transport Administration		
Transport Energy-Efficiency Improving Action Plan	Transport	CO ₂ , N ₂ O	increasing energy efficiency in transport sector	Economic	Planned	Transport Energy-Efficiency Improving Action Plan purposes is the determination of energetic targets to be enforced in the National Transport Strategy (NTS) and the means of their achievement, or the working out of the short and medium term energy efficiency action plan of transport.		Hungarian Transport Administration		
National Intelligent Transport Systems Strategy	Transport	CO ₂ , N ₂ O	increasing the efficiency of the transport system		Planned	The task of the intelligent transport systems (ITS) is to increase the efficiency of the transport system (e.g. capacity exploitation, energy efficiency, transportation safety and security) by integrating information technology.		Hungarian Transport Administration	-959.00

Name of mitigation action ^a	Sector(s) affected ^b	GHG(s) affected	Objective and/or activity affected	Type of instrument ^c	Status of implementation ^d	Brief description ^e	Start year of implementation	Implementing entity or entities	Estimate of mitigation impact (not cumulative, in kt CO ₂ eq)	
									2020	2030
National Energy Strategy*	Cross-cutting	CO ₂ , CH ₄ , N ₂ O	security of energy supply; modernisation of electric power stations and grid; promoting RES, energy efficiency and sustainability; reduction of carbon intensity		Implemented	The goal of the strategy is to increase security of energy supply, competitiveness, the sustainability of the sector, energy efficiency, energy conservation, the share of renewable energy and nuclear energy in the energy mix until 2030.	2011	Ministry of National Development		
National Renewable Energy Action Plan*	Cross-cutting	CH ₄ , CO ₂ , N ₂ O	improving the share of RES and identifies the key areas of intervention	Other (Regulatory)	Implemented	The action plan sets the target of 14,65% of renewable energy share by the year 2020.	2010	Ministry of National Development		
3rd National Energy Efficiency Action Plan*	Cross-cutting	CH ₄ , CO ₂ , N ₂ O	promoting an imposing reduction in primary energy consumption in all sectors of the economy	Other (Regulatory)	Implemented	The major goal of 3rd NEEAP is to achieve an imposing reduction in primary energy consumption in all sectors of the economy, which means a significant reduction in building, residential and transport sector as well.	2015	Ministry of National Development		-1,464.00
Economy Greening Scheme (EGS)*	Cross-cutting	CO ₂ , CH ₄ , N ₂ O	supporting RES, R&D&I and demonstration projects on field of transition to low emission economy	Fiscal	Implemented	The scheme can offer funding for research, innovation and demonstration projects in the field of emission reduction; energy production for renewable energy sources; support of transition for low emission transport and to fund the 50% of the national contribution to the Green Climate Fund.	2007	Ministry for National Economy		
Green Investment Scheme (GIS)*	Cross-cutting	CH ₄ , CO ₂ , N ₂ O	implementing environmental programs related to energy efficiency and RES	Fiscal	Implemented	The scheme is aimed to foster green economic development in Hungary by implementing environmental programs related to energy efficiency and renewable energy sources using revenues from selling the country's Kyoto Units.	2007	Ministry of National Development		
Green Economy Financing Scheme (GEFS)*	Cross-cutting	CO ₂ , CH ₄ , N ₂ O	implementing environmental programs related to energy efficiency and RES	Fiscal	Implemented	The scheme is aimed to foster green economic development in Hungary by implementing environmental programs related to energy efficiency and renewable energy sources using revenues from selling the country's Kyoto Units.	2014	Ministry of National Development		
"Warmth of Home" Programme*	Energy	CO ₂ , CH ₄ , N ₂ O	promoting energy efficiency in domestic sector	Economic	Implemented	The aim of the programme is to further reduce the households' energy costs, from domestic budgetary resources, by replacing outdated household machines, boilers, doors and windows.	2014	Ministry of National Development		

Table 3

Progress in achievement of the quantified economy-wide emission reduction target: information on mitigation actions and their effects

Name of mitigation action ^a	Sector(s) affected ^b	GHG(s) affected	Objective and/or activity affected	Type of instrument ^c	Status of implementation ^d	Brief description ^e	Start year of implementation	Implementing entity or entities	Estimate of mitigation impact (not cumulative, in kt CO ₂ eq)	
									2020	2030
Extension and enlargement of Paks Nuclear Power Plant*	Energy	CH ₄ , CO ₂ , N ₂ O	extension of the technical lifetime and capacity enlargement	Economic	Adopted	In accordance with the National Energy Strategy, it is assumed that two new units of approximately 1,000 MW each will be put into operation by 2030, i.e. the 4 Paks units currently in operation (2,000 MW) and the two new units (2,000 MW) will be operating parallel between 2032 and 2037 (the four current Paks units will be decommissioned by 2037).		Ministry of National Development		
National Waste Management Plan (2014-2020)*	Waste management/waste	CH ₄ , CO ₂	developing separate collection and recycling, decreasing landfilling	Other (Regulatory)	Implemented	The main objectives of the plan is to increase recovery and recycling rates, reduce waste, decrease landfilling, develop separate collection and to separate reusable components.	2014	Ministry of Agriculture		
National Implementation Programme on Waste Water Collection and Treatment*	Waste management/waste	CH ₄ , N ₂ O	improving waste water treatment	Other (Regulatory)	Implemented	The aim of the programme is to improve the treatment of waste water collected with public utility sewage systems, the sewerage of settlements and regions and to increase the recovery rate of waste water.	2014	Ministry of Interior		
National Waste Law*	Waste management/waste	CH ₄ , CO ₂	introduction of landfill tax, improving separate household waste collection and declaring principles of waste treatment	Other (Economic)	Implemented	The basis of Hungary's waste management policy is – the Act on Waste (Act No. CLXXXV in 2012) and its implementing regulations. This Act implements the Waste Framework Directive (2008/98/EC) of the European Union and have targets on the <ul style="list-style-type: none"> • reduction of biodegradable residual wastes landfilled • preparation for reuse and recycling on the different waste materials • waste treatment 		Ministry of Agriculture		
Promotion of renewables*	Energy	CO ₂ , CH ₄ , N ₂ O	Increasing the share of renewable energy in the energy mix	Other (Regulatory)	Implemented	Compulsory take-over of renewable energy on subsidised prices		Ministry of National Development		

Table 3

Name of mitigation action ^a	Sector(s) affected ^b	GHG(s) affected	Objective and/or activity affected	Type of instrument ^c	Status of implementation ^d	Brief description ^e	Start year of implementation	Implementing entity or entities	Estimate of mitigation impact (not cumulative, in kt CO ₂ eq)	
									2020	2030
Environment and Energy Efficiency Programme*	Cross-cutting	CH ₄ , CO ₂ , N ₂ O	Supporting the adaptation to the effects of climate change. Development of municipal sewage systems, waste water treatment facilities. Development related to waste management. Development related to the protection of nature. Energy efficiency improvements, application of renewables.	Fiscal	Implemented	Supporting the adaptation to the effects of climate change. Development of municipal sewage systems, waste water treatment facilities. Development related to waste management. Development related to the protection of nature. Energy efficiency improvements, application of renewables.	2014	Ministry of National Development		

Note: The two final columns specify the year identified by the Party for estimating impacts (based on the status of the measure and whether an ex post or ex ante estimation is available).

Abbreviations: GHG = greenhouse gas; LULUCF = land use, land-use change and forestry.

- ^a Parties should use an asterisk (*) to indicate that a mitigation action is included in the 'with measures' projection.
- ^b To the extent possible, the following sectors should be used: energy, transport, industry/industrial processes, agriculture, forestry/LULUCF, waste management/waste, other sectors, cross-cutting, as appropriate.
- ^c To the extent possible, the following types of instrument should be used: economic, fiscal, voluntary agreement, regulatory, information, education, research, other.
- ^d To the extent possible, the following descriptive terms should be used to report on the status of implementation: implemented, adopted, planned.
- ^e Additional information may be provided on the cost of the mitigation actions and the relevant timescale.
- ^f Optional year or years deemed relevant by the Party.

Custom Footnotes

Table 4

Reporting on progress^{a, b}

<i>Year^c</i>	<i>Total emissions excluding LULUCF</i>	<i>Contribution from LULUCF^d</i>	<i>Quantity of units from market based mechanisms under the Convention</i>		<i>Quantity of units from other market based mechanisms</i>	
	<i>(kt CO₂ eq)</i>	<i>(kt CO₂ eq)</i>	<i>(number of units)</i>	<i>(kt CO₂ eq)</i>	<i>(number of units)</i>	<i>(kt CO₂ eq)</i>

2010	65,493.05	-4,024.10				
2011	63,906.33	-3,686.15				
2012	59,986.38	-4,305.02				
2013	57,428.46	-3,438.20				
2014						

Abbreviation : GHG = greenhouse gas, LULUCF = land use, land-use change and forestry.

^a Reporting by a developed country Party on the information specified in the common tabular format does not prejudice the position of other Parties with regard to the treatment of units from market-based mechanisms under the Convention or other market-based mechanisms towards achievement of quantified economy-wide emission reduction targets.

^b For the base year, information reported on the emission reduction target shall include the following: (a) total GHG emissions, excluding emissions and removals from the LULUCF sector; (b) emissions and/or removals from the LULUCF sector based on the accounting approach applied taking into consideration any relevant decisions of the Conference of the Parties and the activities and/or land that will be accounted for; (c) total GHG emissions, including emissions and removals from the LULUCF sector. For each reported year, information reported on progress made towards the emission reduction targets shall include, in addition to the information noted in paragraphs 9(a–c) of the UNFCCC biennial reporting guidelines for developed country Parties, information on the use of units from market-based mechanisms.

^c Parties may add additional rows for years other than those specified below.

^d Information in this column should be consistent with the information reported in table 4(a)I or 4(a)II, as appropriate. The Parties for which all relevant information on the LULUCF contribution is reported in table 1 of this common tabular format can refer to table 1.

	GHG emissions and removals ^b							GHG emission projections	
	(kt CO ₂ eq)							(kt CO ₂ eq)	
	Base year (1990)	1990	1995	2000	2005	2010	2013	2020	2030

Abbreviations : GHG = greenhouse gas, LULUCF = land use, land-use change and forestry.

^a In accordance with the "Guidelines for the preparation of national communications by Parties included in Annex I to the Convention, Part II: UNFCCC reporting guidelines on national communications", at a minimum Parties shall report a 'with measures' scenario, and may report 'without measures' and 'with additional measures' scenarios. If a Party chooses to report 'without measures' and/or 'with additional measures' scenarios they are to use tables 6(b) and/or 6(c), respectively. If a Party does not choose to report 'without measures' or 'with additional measures' scenarios then it should not include tables 6(b) or 6(c) in the biennial report.

^b Emissions and removals reported in these columns should be as reported in the latest GHG inventory and consistent with the emissions and removals reported in the table on GHG emissions and trends provided in this biennial report. Where the sectoral breakdown differs from that reported in the GHG inventory Parties should explain in their biennial report how the inventory sectors relate to the sectors reported in this table.

^c 20XX is the reporting due-date year (i.e. 2014 for the first biennial report).

^d In accordance with paragraph 34 of the "Guidelines for the preparation of national communications by Parties included in Annex I to the Convention, Part II: UNFCCC reporting guidelines on national communications", projections shall be presented on a sectoral basis, to the extent possible, using the same sectoral categories used in the policies and measures section. This table should follow, to the extent possible, the same sectoral categories as those listed in paragraph 17 of those guidelines, namely, to the extent appropriate, the following sectors should be considered: energy, transport, industry, agriculture, forestry and waste management.

^e To the extent possible, the following sectors should be used: energy, transport, industry/industrial processes, agriculture, forestry/LULUCF, waste management/waste, other sectors (i.e. cross-cutting), as appropriate.

^f Parties may choose to report total emissions with or without LULUCF, as appropriate.

Abbreviation: USD = United States dollars.

^a Parties should fill in a separate table for each year, namely 2011 and 2012, where 2014 is the reporting year.

^b Parties should provide an explanation on methodology used for currency exchange for the information provided in table 7, 7(a) and 7(b) in the box below.

^c This refers to support to multilateral institutions that Parties cannot specify as climate-specific.

^d Parties should explain in their biennial reports how they define funds as being climate-specific.

^e This refers to funding for activities which are cross-cutting across mitigation and adaptation.

^f Please specify.

^g Multilateral climate change funds listed in paragraph 17(a) of the "UNFCCC biennial reporting guidelines for developed country Parties" in decision 2/CP.17.

^h Other multilateral climate change funds as referred in paragraph 17(b) of the "UNFCCC biennial reporting guidelines for developed country Parties" in decision 2/CP.17.

Custom Footnotes

Each Party shall provide an indication of what new and additional financial resources they have provided, and clarify how they have determined that such resources are new and additional. Please provide this information in relation to table 7(a) and table 7(b).
